

ABOUT SAGE

Sage Advisory is an independent asset management firm that serves the institutional and private client marketplace with conventional and fixed income asset management, asset/liability solutions, and global asset allocation strategies. Based in Austin, Texas, Sage was founded in 1996 with a simple mission: to better meet the unique investment management needs of institutions through industry-leading analytical services, innovative investment solutions, and an unwavering focus on risk management.

SUSTAINABLE INVESTING

Sustainable investing incorporates sustainability criteria into the investment process to identify companies that could offer long-term value creation. For fixed income solutions, Sage applies a proprietary Sage Leaf Score® framework that evaluates issuers based on materiality and sustainability risks and opportunities.

SAGE LEAF SCORE®

Sage applies a proprietary Sage Leaf Score framework that provides an assessment of each security in terms of its preparedness and performance across a range of sustainability indicators. The Sage Leaf Score is based on a scale of 1 to 5, with 5 representing sustainability leaders.

2024	4.74	4.37	4.36	3	2.40	2.43		11	24,912	1,881	26,793

Returns for periods less than one year are not annualized.

*Assets Under Advisement (AUA) includes Advisory Only Assets where Sage provides investment recommendations but has no control over implementation of investment decisions and no trading authority.

Sustainable Short Term Fixed Income Management Disclosures:

Compliance Statement: Sage Advisory Services, Ltd. Co. ("Sage") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Sage has been independently verified for the period December 31, 2004 to December 31, 2024. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Firm Information: Sage is a registered investment advisor based in Austin, Texas. Sage specializes in Fixed Income, Balanced and Exchange Traded Fund ("ETF") investment management for insurance companies and other financial institutions, Taft-Hartley organizations, endowments, foundations, non-profit institutions, corporations, defined benefit plans, healthcare institutions, family offices and high net worth individuals. Sage does not utilize leverage, futures, or options in any portfolios included in the composites. A list of composite descriptions, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds are available upon request.

Composite Characteristics: The Sustainable Short Term Fixed Income Composite (the "Composite") consists of all non-wrap program discretionary, fee-paying accounts that are managed for a full quarter according to this style. The Composite contains accounts investing primarily in fixed income securities that apply Sage's custom framework, the Sage Leaf Score, which provides an assessment of each company in terms of its preparedness and performance across a range of Sustainable indicators. The purpose of the Sage Leaf Score framework is to ensure that composite portfolios include the best-performing issuers with respect to financially material Sustainable factors. Prior to September 1, 2022, our composite contained all accounts managed with a Sustainable theme and not specific to the Sage Leaf Score. The Composite creation date is March 31, 2017 and the Composite inception date is January 31, 2012. Not every client's account in the Composite will have the identical characteristics. The actual characteristics with respect to any particular client account may vary based on a number of factors, including but not limited to: (i) the size of the account; (ii) the investment restrictions applicable to the account, if any; and (iii) the market conditions at the time of investment. Prior to September 30, 2024, the composite name was ESG Short Term Fixed Income Composite.

Composite Fee: The gross investment results for the Composite presented herein represent historical gross performance with no deduction for investment management fees but net of all trading expenses. Net returns are net of all trading expenses and are calculated by deducting 1/12th of the highest management fee on a monthly basis from the monthly gross composite return. The model fee is 0.35%. The fee schedule for the Composite is as follows: 0.35% for the first \$10 million; 0.25% for the next \$15 million; and 0.20% for the balance over \$25 million. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. Please see Sage's Form ADV Part 2A for a full disclosure of Sage's fee schedules.

Composite Benchmark: Sage has reviewed the relevant universe of indices and has determined that the Bloomberg 1-3 Year Government/Credit Bond Market Index most closely resembles the Composite managed by Sage. The Bloomberg 1-3 Year Government/Credit Bond Market Index is a broad-based benchmark that includes investment grade, US dollar-denominated, fixed rate Treasuries, government-related and corporate securities with one to three years to maturity. Prior to January 1, 2023, the benchmark was the Bloomberg 1-3 Year U.S. Treasury Bond Market Index. As of January 1, 2023, the new Composite benchmark was selected and applied retroactively because Sage determined it more accurately reflects the historical asset allocation of the Composite.

Calculation Methodology: All valuations, gross, and net returns are based in U.S. Dollars and are computed using a time-weighted total rate of return. Periodic returns have been geometrically linked and annualized for all time periods longer than one year. Portfolio performance results include, and reflect, as applicable, the reinvestment of all interest, accrued income, cash, cash equivalents, realized and unrealized gains and losses. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Internal dispersion is the asset-weighted standard deviation of annual gross returns of those accounts included in the Composite for the entire year. If there are years whereby there are 5 or fewer accounts, the dispersion is N/A. The 3-year ex-post standard deviation measures the variability of the composite gross returns and the benchmark returns over the preceding 36-month period. If there are years whereby there are fewer than 36 monthly returns available, the 3-year annualized ex-post standard deviation of this composite and its benchmark is N/A.

Risk Disclosures: Actual performance results may differ from Composite returns, depending on the size of the account, investment guidelines and/or restrictions, inception date and other factors. Past performance is not indicative of future returns. As with any investment vehicle, there is always the potential for gains as well as the possibility of losses. Sustainable investing limits the types and number of investment opportunities available; this may result in the account investing in securities or industry sectors that underperform the market as a whole or underperform other strategies screened for sustainable investing standards. Changes in legislation, scientific thinking, national and supra-national policies, and behaviors could significantly affect the securities of companies held within the strategy and the strategy may underperform the market as a whole. Sustainable investing limits the types and number of investment opportunities available and, as a result, may underperform other strategies that do not have a Sustainable focus.
