

STRATEGY OVERVIEW

The Sage Tax-Aware Multi-Asset Income ETF Strategy is a conservative, yield-focused ETF strategy that seeks to meet investors' income needs by tactically investing in the global taxable and tax-exempt fixed income markets, along with exposure to high-dividend equity and alternative segments.

INVESTMENT PHILOSOPHY

Our focus is on getting the big market segment decisions right. This is based on our belief that an asset allocation's market segments have the most meaningful impact on portfolio performance and risk management. Our top-down investment process includes an evaluation of four key factors: macroeconomic growth, policy, relative valuations, and technical analysis.

INVESTMENT PROCESS

Investment decisions are made by our investment committee, which meets weekly.

We overweight market segments that appear most favorable given current valuations, fundamentals, and the macroeconomic environment.

This is an ongoing process that monitors market and economic conditions, as well as aggregate portfolio risk.

TAX-AWARE MULTI ASSET INCOME ETF COMPOSITE MANAGEMENT DISCLOSURES:

Compliance Statement: Sage Advisory Services, Ltd. Co. ("Sage") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Sage has been independently verified for the period December 31, 2004 to December 31, 2024. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Firm Information: Sage is a registered investment advisor based in Austin, Texas. Sage specializes in Fixed Income, Balanced and Exchange Traded Fund ("ETF") investment management for insurance companies and other financial institutions, Taft-Hartley organizations, endowments, foundations, non-profit institutions, corporations, defined benefit plans, healthcare institutions, family offices and high net worth individuals. Sage does not utilize leverage, futures, or options in any portfolios included in the composites. A list of composite descriptions, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds are available upon request.

Composite Characteristics: The Tax Aware Multi Asset Income ETF Composite (the "Composite") consists of all non-wrap program discretionary, fee-paying, stand-alone accounts that are managed for a full month according to this style. This Composite does include proprietary, fee-paying accounts. The Composite contains accounts investing primarily in Exchange-Traded Products (ETPs) such as Exchange-Traded Funds (ETFs) and Exchange-Traded Notes (ETNs). The Composite creation and inception date is September 30, 2012. Not every client's account in the Composite will have the identical characteristics. The actual characteristics with respect to any particular client account may vary based on a number of factors, including but not limited to: (i) the size of the account; (ii) the investment restrictions applicable to the account, if any; and (iii) the market conditions at the time of investment.

Composite Fee: The gross investment results for the Composite presented herein represent historical gross performance with no deduction for investment management fees but net of all trading expenses. Net returns are net of all trading expenses and are calculated by deducting 1/12th of the highest management fee on a monthly basis from the monthly gross composite return. The model fee is 0.40%. The fee schedule for the Composite is as follows: 0.40% for the first \$10 million; 0.35% for the next \$15 million; and 0.25% for the balance over \$25 million. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. Please see Sage's Form ADV Part 2A for a full disclosure of Sage's fee schedules. The Composite strategy invests in ETFs and an investor in the Composite strategy will indirectly bear the operating expenses of the ETFs in which it invests. As of December 31, 2024, the underlying ETF expense ratio of the Composite was 0.31%.

Composite Benchmark: Sage has reviewed the relevant universe of indices and has determined that a custom weighted benchmark of 20% MSCI ACWI High Dividend Yield / 80% Bloomberg 1-15 Year Municipal Bond Index ("BC 1-15 Yr Muni") most closely resembles the Composite managed by Sage (the "Composite Benchmark"). The MSCI ACWI High Dividend Yield is a market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets with higher dividend income and quality characteristics than average. The BC 1-15 Yr Muni consists of a broad selection of investment grade general obligation and revenue bonds of maturities ranging from one year to 17 years. It is an unmanaged index representative of the tax-exempt bond market.

Calculation Methodology: All valuations, gross, and net returns are based in U.S. Dollars and are computed using a time-weighted total rate of return. Periodic returns have been geometrically linked and annualized for all time periods longer than one year. Portfolio performance results include, and reflect, as applicable, the reinvestment of all interest, accrued income, cash, cash equivalents, realized and unrealized gains and losses. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Internal dispersion is the asset-weighted standard deviation of annual gross returns of those accounts included in the Composite for the entire year. If there are years whereby there are 5 or fewer accounts, the dispersion is N/A. The 3-year ex-post standard deviation measures the variability of the composite gross returns and the benchmark returns over the preceding 36-month period. If there are years whereby there are fewer than 36 monthly returns available, the 3-year annualized ex-post standard deviation of this composite and its benchmark is N/A.

Risk Disclosures: Actual performance results may differ from Composite returns, depending on the size of the account, investment guidelines and/or restrictions, inception date and other factors. Past performance is not indicative of future returns. As with any investment vehicle, there is always the potential for gains as well as the possibility of losses. The Composite strategy invests in ETPs such as ETFs and ETNs. Investors should consider ETPs' investment objectives, risks, charges, and expenses carefully before investing. The investment return and principal value of an ETP will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. ETPs trade like stocks and may trade for less than their net asset value. Investments in ETNs may be subject to the risk that their value is reduced because of a downgrade in the issuer's credit rating, potentially resulting in default.
