Sustainable Fixed Income

1Q 2026

Comprehensive Overview

Sage Advisory Services
5900 Southwest Parkway
Building 1, Suite 100
Austin, Texas 78735

SUSTAINABLE
 SAGE

Firm Overview

Who We Are

- Founded in 1996
- 100% employee operated
- 17-member investment team has an average industry experience of 18 years
- Responsible Investing strategies include SRI, Sustainable, Impact, Values Based, and Mission Driven

Why Sage

Agility

Our size and independence as an employee-controlled firm enable us to take a nimble approach.

Alignment

We customize the investment experience to align with each client's unique objectives and needs.

Consistency

We have a tenured investment team and proven process that enable us to deliver expected results.

Culture

We are committed to cultivating a culture of service and trust among our clients, our employees, and our community.

Who We Serve

*Preliminary AUM/AUA as of 3/31/2026. ** "Who We Serve" is client type by AUM/AUA.

Executive Leadership

Robert G. Smith, III, AIF® & CIMC

*President & Co-CIO

Responsible Investing Reporting & Research

Client Reporting

- Monthly portfolio reviews detailing Sage Leaf Scores® by security
- Quarterly impact and climate reports
- Quarterly portfolio performance reviews
- Semiannual sustainability trend assessments

Market Research

- Monthly Sustainability Perspectives publications
- Monthly market commentaries
- Quarterly strategy reviews
- Special reports and conceptual analyses
- Sustainability website info and video content

Sage's Instagram

Investment Process Part I

Our Approach

Investment Philosophy

We believe that over complete market cycles, consistent returns are driven by income generation, value opportunities, and rigorous risk management practices.

Generate Income

Generate a consistent income advantage by harvesting a diversified set of risk premiums: duration, credit, structure and liquidity.

Capture Value

Capture value opportunities by taking advantage of market dislocations due to unexpected volatility or market inefficiencies.

Manage Risk

Actively manage portfolio-level risk to ensure alignment with investment outlook and client objectives.

Our Approach

Investment Process

Our teams work together to balance the development of our macro views with thoughtful portfolio design, value-driven security selection, and active risk management.

Our Approach

Risk Management

We believe that successful risk management requires a multi-dimensional approach utilizing holdings, statistical, and factor-based analysis.

Holdings-Based Measures

Traditional risk measures such as key rate durations, sector exposures, quality distributions, and spreads – relative to market-based indices or custom liability-driven benchmarks.

Statistical-Based Analysis

Analysis of exposures to key factors that impact fixed income portfolios (rates, volatility, spreads, etc.) and the determination of factor contributions, the expected volatility of returns, and tracking error.

Factor-Based Stress Testing

Dynamic scenario testing across simple, historical, and more complex hypothetical factor-based events to determine the distributions of expected returns and tail-risk sensitivities.

Sustainability Analysis

Sustainability risk assessment that takes a pragmatic approach in evaluating industries and companies on financially material factors

Holdings-Based Measures

Core Aggregate Strategy Positioning

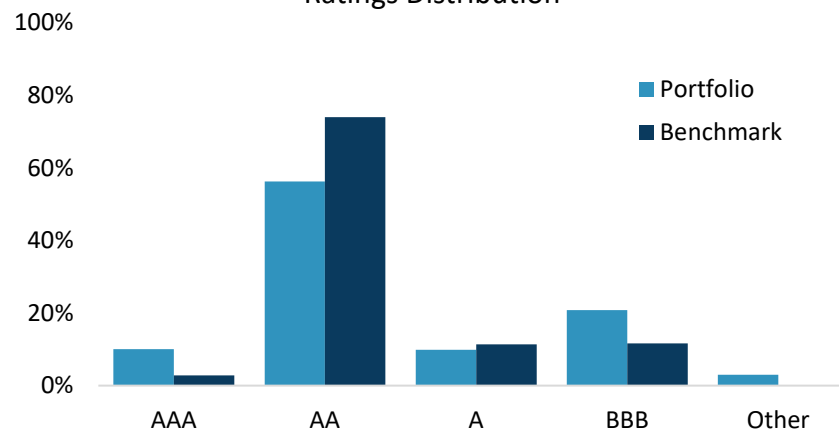

Traditional fixed income risk measures such as duration along key maturities, as well as credit exposure, DTS, credit quality, and duration contribution.

Sage Leaf Score® Evaluation

Industry Analysis

Materiality

Analyze factors that are most relevant to a company's financial performance and long-term value creation.

Sustainability Risks

Develop a sustainability profile of the industry based on quantitative and qualitative factors.

Exceptions

We minimize exposure to tobacco, coal mining/ extraction, and small arms.

Company Analysis

Trends Analysis

Determine how a company is trending in the sustainability factors most relevant to it.

Peer Comparison

Compare a company to its industry counterparts to identify strengths, weaknesses, and competitive positioning.

Controversies

Assess the impact of negative incidents to understand risks and implications for sustainability performance.

Sage Leaf Score

Sage invests only in issuers that have a Leaf Score of 3 or greater

Sustainability Leader

Above Average

Average

Below Average

Sustainability Laggard

Investment Process Part II

Dynamic Credit Selection Process

Balance Qualitative and Quantitative Factors

Sector Level Analysis

Ability to pull average statistics by sector to determine overweight and underweight allocation

Proprietary Rating Scale

Captures data from issuers financial reports and ranks issuers based on specific metrics that may indicate outperformance

Deep Dive on High Value Credits

Dissect qualitative credit characteristics i.e., governance, budgetary trends, sustainability factors, and political environment

Proprietary Valuation Screen

Analyze relative value vs peers, sectors, and structure
Look for upgrade candidates and mispriced opportunities

Market Assessment

Portfolio Manager team assesses liquidity, supply and demand dynamics, and market constraints

Establish Position

Credit Committee meets to review high value credits and discuss the addition/removal of issuers

Sage Fundamental Ratings

Assign individual ratings to key fundamental metrics, such as liquidity, profitability, scale, and leverage. Fundamental factor ratings are weighted to derive an overall investment rating, providing a comprehensive assessment that can be compared to public ratings from agencies like Moody's or S&P.

Sample SDG Impact Reporting

Impact Assessment Methodology

The SDG Impact Rating provides a holistic metric of impact using the United Nations (UN) Sustainable Development Goals (SDGs) as a reference framework. The rating measures the extent to which companies are managing negative externalities in their operations across the entire value chain to minimize negative impacts, while at the same time making use of existing and emerging opportunities in their products and services to contribute to the achievement of the Sustainable Development Goals. A company's impact is measured thematically, following the SDG framework, as well as at an aggregate level. For each of the 17 SDGs, a company's impact is determined by three pillars:

PRODUCTS & SERVICES

OPERATIONS MANAGEMENT

CONTROVERSIES

1. Identify to what extent products and services contribute to or obstruct the SDGs.
2. Evaluate impact along the entire value chain.
3. Identify alleged or verified failures and companies' responsiveness to respect established norms that may obstruct the SDGs.

The SDG Impact Score ranges on a scale from -10 to 10 with an underlying classification into five broad assessment categories.

Portfolio SDG Impact: Sage Portfolio vs. Benchmark

Sage Portfolio

Significant Positive Impact (5.1 to 10)

Limited Positive Impact (0.2 to 5.0)

No net impact (-0.1 to 0.1)

Limited Negative Impact (-5.0 to -0.2)

Significant Negative Impact (-10 to -5.1)

0% 20% 40% 60% 80%

5% of portfolio holdings had no data to collect

Benchmark

Significant Positive Impact (5.1 to 10)

Limited Positive Impact (0.2 to 5.0)

No net impact (-0.1 to 0.1)

Limited Negative Impact (-5.0 to -0.2)

Significant Negative Impact (-10 to -5.1)

0% 20% 40% 60% 80% 100%

4% of portfolio holdings had no data to collect

Mapping Portfolio Impact

SDGs Represented and Their Relative Impact Intensities

Sage's portfolio and the Index have no net impact on SDGs 2, 6, 4, 11, 14, and 15.

Impact by SDG: Sage Portfolio vs. Benchmark

* The top 5 holdings comprise ~10% of the total Sage Sustainable Intermediate Term Fixed Income Wrap composite and ~25% of the corporate only portion of the Sage Sustainable Intermediate Term Fixed Income Wrap composite.

IMPORTANT DISCLOSURES

This report is for informational purposes only and is not intended as investment advice or an offer or solicitation with respect to the purchase or sale of any security, strategy or investment product. Although the statements of fact, information, charts, analysis and data in this report have been obtained from, and are based upon, sources Sage believes to be reliable, we do not guarantee their accuracy, and the underlying information, data, figures and publicly available information has not been verified or audited for accuracy or completeness by Sage. Additionally, we do not represent that the information, data, analysis and charts are accurate or complete, and as such should not be relied upon as such. All results included in this report constitute Sage's opinions as of the date of this report and are subject to change without notice due to various factors, such as market conditions. No part of this Material may be reproduced in any form, or referred to in any other publication, without our express written permission.

Investors should make their own decisions on investment strategies based on their specific investment objectives and financial circumstances. All investments contain risk and may lose value. Debt or fixed income securities are subject to market risk, credit risk, interest rate risk, call risk, tax risk, political and economic risk, derivatives risk, income risk, and other investment company risk. As interest rates rise, bond prices fall. Credit risk refers to an issuer's ability to make interest payments when due. Below investment grade or high yield debt securities are subject to liquidity risk and heightened credit risk. Foreign investments involve additional risks as noted above. Investing involves substantial risk and high volatility, including possible loss of principal. Bonds and bond funds will decrease in value as interest rates rise. Past performance is not a guarantee of future results.

Sage Advisory Services, Ltd. Co. is a registered investment adviser that provides investment management services for a variety of institutions and high net worth individuals.
